1. Information regarding the selected media file will be shown on the right side of the screen under the _____.
    a. Media details
    b. Description
    c. More
    d. Attachment Details
    e. None of these
2. What does DOM stand for?
    a. Document Object Management
    b. Data Object Model
    c. Document Object Model
    d. Data Object Management
    e. None of these
3. A _____ function is a function which is passed as a parameter to another function.
    a. Callback
    b. Getback
    c. Parameter
    d. Pass
    e. None of these
4. Which of the following allow you to execute definite functions?
    a. Themes
    b. Functions
    c. Widgets
    d. Opacity
    e. None of these
5. _____are intended for broad grouping of your posts?
    a. Categories
    b. Tags
    c. Sections
    d. Pages
    e. None of these
6. When was Akismet launched?
    a. 2004
    b. 2005
    c. 2006
    d. 2007
    e. None of these
7. _____can be used for making dynamic changes(client side) in any web documents.
    a. PHP
    b. JavaScript
    c. C++
    d. WordPress
    e. None of these
8. The _____ functions redirects webpages through server side scripting language like PHP.
    a. redirect()
    b. header()
    c. connect()
    d. mysqlconnect()
    e. None of these
9. Which of the following function is used to split a string by string?
    a. explode()
    b. chop()
    c. split()
    d. str_split()
    e. None of these
10. The _____ formatting character displays the day of the year for the date() function.
    a. W
    b. z
    c. m
    d. A

e. None of these

11. The indexing in a PHP array starts with _____.
    a. -1
    b. 0
    c. 1
    d. 2
    e. None of these

12. Which of the following PHP sorting functions would you use for preserving key associations and sorting an array in the ascending order by value?
    a. Sort()
    b. Krsort()
    c. Asort()
    d. Usort()
    e. None of these

13. Which of the following loops allows you to pick one element at a time from an array containing several elements?
    a. for loop
    b. if..else loop
    c. while loop
    d. foreach loop
    e. None of these

14. What is the practice of separating the true internal working of an application from the user called?
    a. Polymorphism
    b. Abstraction
    c. Inheritance
    d. Encapsulation
    e. None of these

15. Which of the following keywords prevents child classes from overriding a method?
    a. Protected
    b. Final
    c. Static
    d. Abstract
    e. None of these

16. What is the default file extension of PHP files?
    a. .xml
    b. .ph
    c. .php
    d. .html
    e. None of these

17. A PHP script must start with _____.
    a. <?php?>
    b. >php
    c. <?php
    d. <<php
    e. None of these

18. Which of the following administration tools of WordPress allows you to install themes openly?
    a. ThemeInstall
    b. Appearance
    c. Functionality
    d. OpenThemes
    e. None of these

19. Which of the following PHP version is compatible with WordPress?
    a. 4
    b. 5
    c. 5.1
    d. 5.
    e. None of these

20. Which of the following WordPress screens is visible as the first screen when you log into the administration area of your blog?
    a. Admin Tools
    b. Welcome

    c. Home

    d. Dashboard

    e. None of these

21. What is the storage requirement of the TIMESPAN data type?

    a. 1 byte

    b. 2 bytes

    c. 3 bytes

    d. 4 bytes

    e. None of these

22. Which of the following statements allows you to create a table?

    a. CREATE TABLE table_name (column_type column_name);

    b. CREATE table_name (column_type column_name);

    c. CREATE table_name (column_name column_type);

    d. CREATE TABLE table_name (column_name column_type);

    e. None of these

23. Which WordPress role can create more admins?

    a. Super Admin

    b. Admin

    c. Anyone

    d. No one

    e. None of these

24. What will be the output of the following php code?

```php
<?php
$num = 1;
$num1 = 2;
print $num . "+".$num1;
?>
```

    a. 3

    b. 1+2

    c. 1.+.2

    d. Error

    e. None of these

25. Which of the following functions allow you to destroy a session?

    a. session_destroy()

    b. unset()

    c. Neither A not B

    d. Both A and B

    e. None of these

26. The variable that allows you to retrieve a cookie's value is _____.

    a. &_COOKIE

    b. ^_COOKIE

    c. $_COOKIE

    d. _COOKIE

    e. None of these

27. Which of the following functions allows you to open a file using PHP?

    a. open()

    b. file()

    c. f_open()

    d. fopen()

    e. None of these

28. Which of the following functions allows you to create a directory?

    a. mdir()

    b. mkdir()

    c. createdir()

    d. dir()

    e. None of these

29. Which of the following allows you to compare two strings?

    i. strspn();

ii. strcmp();

iii. strcasecmp();

iv. strcspn();

a. i and ii

b. ii and iii

c. I and iv

d. All of them

e. None of these

30. Which of the following quantifiers is used for matching any string containing zero or more s?

a. s?

b. s+

c. s^

d. s$

e. None of these

31. What is the difference between GET and POST methods?

a. The GET method can send unlimited data for request, but the POST method can send only limited data.

b. The POST method is simpler than the GET method.

c. The POST method is more secure than the GET method.

d. The POST method is better than the POST method for sensitive requests.

e. None of these.

32. What is the difference between post and page?

a. Pages are incorporated in RSS feed, while posts are not.

b. Post have the custom template feature, while pages have not.

c. Posts are social, while pages are not

d. Posts are timelines, while pages are not.

e. None of these

33. What will header() function do?

a. Send raw HTTP header to a client.

b. Generate metadata

c. Get a browser's details

d. Add dynamic content to a webpage

e. None of these

34. Consider the following variable declarations .which of the given option is NOT the correct way to output 'XYZ Corp, India'?

$Var1 = 'XYZ Corp';

$$ Var1 = ', India';

a. echo '$Var1 $$Var1';

b. echo '$Var1 ${$Var1}';

c. echo '$Var1 {$$ Var1}';

d. echo '$Var1 ${'XYZ Corp'}';

e. None of these

35. What is an associative array?

a. An array that allows accessing an array's element by numeric indexes.

b. An array that allows accessing an array's element by numeric name.

c. An array that allows accessing an array's element by numeric reference.

d. An array that allows accessing an array's element by numeric pointer.

e. None of these

36. Which of the following statements is NOT true about PHP constructors?

a. Class constructors were introduced in PHP3

b. Constructors can call the methods of the class

c. Constructors can accept parameters.

d. Class constructors can call other constructors

e. None of these

37. What is the difference between $$var and $ var?

a. $$var In array element of the array $var.

b. $$var and $var are same.

c. $var is used to access the $$var variable.

d. $$var sets the value of $var as a variable

e. None of these

38. Which of the below statement is true?
    a. In PHP, there is little code for helping you interface to databases, but you can write such codes.
    b. Any data in Oracle should be transferred to MySQL for being able to use PHP on the data.
    c. PHP interfaces to multiple RDBMS like Oracle and MySQL with different interfaces.
    d. PHP interfaces to multiple RDBMS like Oracle and MySQL with a wrapper layer for transferring the code.
    e. None of these

39. How can you store a number 25 in a cookie named 'Get'?
    a. makecookie('Get',25);
    b. setcookie('Get',25);
    c. cookie('Get',25);
    d. createcookie('Get',25);
    e. None of these

40. What will be the value of X in the following function if you are required to check the size of a file?
    $size = X(filename);?
    a. Size
    b. getSize
    c. sizeoffile
    d. filesize
    e. None of these

41. Which of the following statements will NOT output 'True'?
    a. `if("true"){print 'True';}`
    b. `$string = "true";`
    c. `If(strpos("truelll","true")){print "True";}`
    d. `If(strstr("truelll","true")){print "True";}`
    e. None of these

42. What is happening in the following function call?
    ```php
    <?php
    function calculate($cost,$salestax){
        $totalamount = $cost + $salestax;
    }
    $costtag = 40;
    $salestaxtag = 4;
    calculate($costtag,$salestaxtag)
    ?>
    ```
    a. Type hinting
    b. Default argument value
    c. Call by value
    d. Call by reference
    e. None of these

43.
    ```php
    <?php
    $colors = array("Red","Blue, "Orange");
    Echo "I like " . $colors[0] . ", " .$colors[1] . "and " . $colors[2]. ".";
    ?>
    ```
    a. I like Red Blue and Orange)
    b. I like Red, Blue and Orange.
    c. I like Red, Blue and Orange
    d. I like. Red.,. Blue. and) Orange).
    e. None of these

44. Which of the given statements will give a different output?
    a. `<P="Displaying sample text"; ?>`
    b. `<?echo "Displaying sample text"; ?>`
    c. `<script language="php">print "Displaying sample text";</script>`
    d. `<?PHP echo "Display sample text"; php?>`
    e. None of these

45. Which of the given statements is the proper way for setting a session variable?
    a. `session_set_save_handler('my','mydelete','myopen','mygarbade','myclose','myread');`
    b. `$_SESSION['xxx'] = 'too';`
    c. `$xxx = $_SESSION['xx'];`

d. `session_start();`

e. None of these

46. Who is the father of PHP?
    a. Rasmus Lerdorf
    b. Willam Makepiece
    c. Drek Kolkevi
    d. List Barely
    e. None of these

47. Which one of the following is the right way of defining a function in PHP?
    a. function { function body }
    b. data type functionName(parameters) { function body }
    c. functionName(parameters) { function body }
    d. function functionName(parameters) { function body }
    e. None of these

48. Which of the following are correct ways of creating an array?
    i) state[0] = "karnataka";
    ii) $state[] = array("karnataka");
    iii) $state[0] = "karnataka";
    iv) $state = array("karnataka");
    a. iii and iv
    b. ii and iii
    c. Only i
    d. ii, iii and iv
    e. None of these

49. Which function will return true if a variable is an array or false if it is not?
    a. this_array()
    b. is_array()
    c. do_array()
    d. in_array()
    e. None of these

50. Which of the following term originates from the Greek language that means "having multiple forms," defines OOP's ability to redefine, a class's characteristics?
    a. Abstraction
    b. Polymorphism
    c. Inheritance
    d. Differential
    e. None of these

51. Which one of the following keyword is used to inherit our subclass into a superclass?
    a. Extends
    b. Implements
    c. Inherit
    d. Include
    e. All of the above

52. Which keyword allows class members (methods and properties) to be used without needing to instantiate a new instance of the class?
    a. Protected
    b. Final
    c. Static
    d. Private
    e. None of these

53. If your object must inherit behavior from a number of sources you must use a/an
    a. Inheritance
    b. Object
    c. Abstract class
    d. Static class
    e. None of these

54. Which character do the error_reporting directive use to represent the logical operator NOT?
    a. /
    b. !

c. ~

d. ^

e. None of these

55. Which one of the following regular expression matches any string containing zero or one p?

a. p+

b. p*

c. p?

d. p#

e. None of these

56. POSIX Stands for

a. a) Portable Operating System Interface for Unix

b. Portable Operating System Interface for Linux

c. Portative Operating System Interface for Unix

d. Portative Operating System Interface for Linux

e. None of these.

57. Which one of the following functions finds the last occurrence of a string, returning its numerical position?

a. strlastpos()

b. strpos()

c. strlast()

d. strrpos()

e. None of these

58. Which one of the following function is capable of reading a specific number of characters form a file?

a. fgets()

b. fget()

c. fileget()

d. filegets()

e. None of these

59. Which one of the following function outputs the contents of a string variable to the specified resource?

a. filewrite()

b. fwrite

c. filewrites

d. fwrites()

e. fw()

60. The date() function returns ___ representation of the current date and/or time.

a. Interger

b. String

c. Boolean

d. Float

e. Double

61. Which of the following is the right way to use the DateTime class?

a. $date = get_Class(DateTime);

b. $date = class DateTime;

c. $date = new DateTime();

d. $date = new class DateTime();

e. $date = new class DateTimePick();

62. Which two predefined variables are used to retrieve information from forms?

a. $GET & $SET

b. $_GET & $_SET

c. $__GET & $__SET

d. GET & SET

e. GET & STEGET

63. When you use the $_POST variable to collect data, the data is visible to_____

a. None

b. Only you

c. Everyone

d. Selected few

e. All except selected few

64. Which one of the following should not be used while sending passwords or other sensitive information?

a. GET

b. POST
   c. REQUEST
   d. NEXT
   e. NET
65. What is the full form of DNS?
   a. Digital Network System
   b. Domain Network System
   c. Digital Name System
   d. Domain Name System
   e. Document Networking System
66. What is the default port number of HTTP's?
   a. 70
   b. 80
   c. 90
   d. 100
   e. 85
67. Which one of the following function is used to start a session?
   a. start_session()
   b. session_start()
   c. session_begin()
   d. begin_session()
   e. begin_sessionstart()
68. Which function effectively deletes all sessions that have expired?
   a. session_delete()
   b. session_destroy()
   c. session_garbage_collect()
   d. session_expired_delete()
   e. session_expired_return()
69. The session_start() function must appear_____.
   a. After the html tag
   b. After the body tag
   c. Before the body tag
   d. Before the html tag
   e. Either before or after head tag
70. Which one of the following databases has PHP supported almost since the beginning?
   a. Oracle Database
   b. SQL
   c. MySQL
   d. PostgreSQL
71. The updated MySQL extension released with PHP 5 is typically referred to as_____
   a. MySQL
   b. mysql
   c. mysqli
   d. mysqly
   e. mysqle
72. Which method returns the error code generated from the execution of the last MySQL function?
   a. errno()
   b. errnumber()
   c. errorno()
   d. errornumber()
   e. error()
73. Which one of the following methods recuperates any memory consumed by a result set?
   a. destroy()
   b. remover()
   c. alloc()
   d. free()
   e. None of these
74. Which one of the following is not a valid class name?
   a. ShopProduct

    b. Shopproduct

    c. Shopproduct1

    d. 1shopproduct

    e. 1shoproduct

75. Fill in the blank with the best option. An Object is a/an _____ of a class.

    a. Type

    b. Prototype

    c. Instance

    d. Object

    e. None of these

76. Items in WordPress sidebars are generally called:

    a. Blocks

    b. Widgets

    c. Content Areas

    d. Content Zones

    e. None of these

77. How can you install a widget on your blog?

    a. Copy and paste the code for a widget into your blog

    b. Upload a file with the code for the widget onto your server

    c. Go to "widgets" in Appearance, browse available widgets and install them

    d. The server programmer must add it for you

    e. None of these

78. WordPress is a:

    a. Coded Content Silo

    b. Content Production Developer

    c. Customer Relationship Manager

    d. Content Management System

    e. Content Delivery Network

79. WordPress requires which of the following?

    a. A server with Ruby on Rails

    b. A server with a lot of help from your neighbors

    c. A server with PHP and MySQL

    d. A server with PHP and PostgreSQL

    e. A server with Perl and MySQL.

80. You can easily add functionality to your WordPress blog by adding a:

    a. Tool

    b. Adapter

    c. Plug-in

    d. Apps

    e. None of these

81. The sections of information that you can visually drag into your sidebar / footer are called?

    a. Chunks

    b. Excerpts

    c. Widgets

    d. Plugins

    e. Gremlins

82. Once you have entered your content onto your blog and completed final edits, what button do you activate to send it live?

    a. Submit

    b. Enter

    c. Go

    d. Publish

    e. Print

83. When you install a theme, where will the theme files be stored?

    a. wp-admin

    b. wp-content

    c. wp-config

    d. wp-root

    e.   wp-includes

84. What are categories?
    a. They work just like tags
    b. WordPress blogs do not have categories
    c. They allow you to organize your blog by subject.
    d. Labels applicable to other bloggers
    e. All of the above.

85. Which type of database management system is MySQL?
    a. Object-oriented
    b. Hierarchical
    c. Relational
    d. Network
    e. Procedure-oriented

86. The MySQL server used in its client/server architecture is
    a. mysqla
    b. mysqlb
    c. mysqlc
    d. mysqld
    e. mysqle

87. In MySQL databases, the structure representing the organizational views of the entire databases is
    a. Schema
    b. View
    c. Instance
    d. Table
    e. None of these

88. Which of the following clauses is used to display information that match a given pattern?
    a. LIKE
    b. WHERE
    c. IS
    d. SAME
    e. None of these

89. Which clause is used to sort query elements?
    a. GROUP
    b. GROUP BY
    c. ORDER
    d. ORDER BY
    e. SORT BY

90. Which of the following options tells MySQL to ask for entering the password?
    a. –e
    b. –p
    c. –u
    d. –h
    e. -z

91. Which one of the following is displayed below the class name in the class diagrams?
    a. Functions
    b. Methods
    c. Attributes
    d. Constrains
    e. None of these

92. Which one of the following is know as the key to object-oriented programming ?
    a. Polymorphism
    b. Encapsulation
    c. Data abstraction
    d. Orthogonality
    e. None of these

93. In a class diagram the class is divided into three sections, what is displayed in the first section?
    a. Class attributes
    b. Class declaration
    c. Class name

    d. Class function

    e. None of these

94. Which feature allows us to call more than one method or function of the class in single instruction?

    a. Typecasting

    b. Method including

    c. Method adding

    d. Method chaining

95. Which keyword is used to refer to properties or methods within the class itself?

    a. Private

    b. Public

    c. Protected

    d. $this

    e. $present

96. Which keyword allows class members (methods and properties) to be used without needing to instantiate a new instance of the class?

    a. Protected

    b. Final

    c. Static

    d. Private

    e. None of these

97. Which one of the following PHP functions can be used to find files?

    a. glob()

    b. file()

    c. fold()

    d. get_file()

    e. None of these

98. Which of the following PHP functions can be used for generating unique id's?

    a. uniqueid()

    b. id()

    c. md5()

    d. mdid()

    e. None of these

99. Which one of the following functions can be used to compress a string?

    a. zip_compress()

    b. zip()

    c. compress()

    d. gzcompress()

    e. None of these

100. Who is the founder of WordPress?

    a. James Gosling

    b. Matt Mullenweg

    c. James Jackson

    d. Brendan Eich

    e. Tim Berners-Lee
